

Heart Disease – Oct 24, 2011

People with diabetes have a higher-than-average risk of having a heart attack or Stroke. These strike people with diabetes more than twice as often as people without diabetes.

There's a big link between diabetes, heart disease, and stroke. In fact, two out of three people with diabetes die from heart disease or stroke, also called cardiovascular disease. Clogged blood vessels can lead to heart attack, stroke, and other problems. But there are treatments for heart disease, stroke, and blood vessel disease.

Additional information:
